****Getting information from Pre-College Admissions Data/Reports ****

As you begin to fill out or update your reports I wanted to bring your attention to resources that might be of use. You will be able to find out using your pre college contact code whether your students have been applied, been admitted or are currently enrolled. Additional information includes when they were entered and their major.

Use this link to login to the Admissions Pre-College Admin page or copy and paste the following address: https://admissions.msu.edu/precollege/

Admissions Pre-College Administration

MSU Pre-College Programs can partner with MSU Admissions to track the number of our program participants that apply to, are admitted, and enroll at MSU. Besides being useful information for each program individually, it provides the opportunity to look at the recruitment and college-readiness influence that pre-college programs have collectively.

For additional information on how and why to submit program participant data and obtain reports from MSU Admissions, please visit the Pre-College Committee's Resources web site.
